## Perfection

The Big Day is looming ahead.

Whether it's your daughter's senior photo, your husband's job interview of a lifetime or your 50th wedding anniversary, don't you owe it to yourself to have the best smile possible?

You invested in new clothes and expensive shoes, took time for tanning sessions, and even splurged at the salon. You look fabulous.

Look again. Your smile is the first thing people notice about you -- and the last thing they forget. What does your smile say about you?

### A Lasting Impression You Can Be Proud Of

Before your next Big Day (perhaps that family wedding next June?), take a look at your smile. Is there anything you'd like to change? With today's technology, most anything is possible. We offer the most effective, and cost-effective, techniques for improving your smile. Bonding and veneers can straighten teeth and give you a whole new smile. They can fill gaps, cover discolored teeth and even adjust tooth length. A dazzling, natural-looking smile is just a few visits away, and it's the best gift you can give yourself and those around you.

If you'd like to discuss the options for improving your smile, be sure to ask next time you're in the office. Or call us at 425-454-1322 to set up a cosmetic consultation or ask us to mail you our free brochure, "Cosmetic Dentistry for the Healthy Lifestyle."

### A Smile Makeover with Sherry Yee

"Sherry wanted to know what she could do to improve her smile.

I suggested she straighten her teeth with braces for a permanent result. Once her braces were finished, we did bleaching to brighten

and whiten her smile and bonding to reshape her teeth to create the smile she had always wanted. Sherry now has a spectacular smile."

— Dr. Wendy Spektor

"I had off and on considered getting braces in my thirties, but thought my teeth wouldn't look good anyway, because of their shape. I just didn't realize how natural-looking bonding would be. When I smile now, I feel like I'm showing off one of my best features.

Dr. Wendy opens your eyes to what can be, and her enthusiasm is contagious. I like my smile. It's so much more fun flashing it now!" — Sherry Yee

# A Fond Farewell!

It is with great sadness that we say goodbye to our beloved Dr. Law. Dr. Law is moving to Arizona. He has been a special part of our Spektor Dental family for the past eight years, and we will miss him, as we know you will, too. Please stop by to wish him well before he leaves in December. Dr. Wendy and the rest of the Spektor Team will remain here for you and will continue to care for any and all of your dental needs.

Doug Law, DDS

**We** have recently had some restructuring in our office. If you have any questions or concerns, please call and ask for Joni or Leah.

...  
Thank you!

## Whiter = Brighter

Ask us about bleaching – we offer several options from instant whitening in one appointment to a more gradual improvement with a home bleaching process. The latest in whitening is new Zoom2®.

As seen on  
Extreme Makeover

This chairside whitening system uses a light-activated whitening gel containing hydrogen peroxide to whiten an average of eight shades. Schedule your Zoom2® appointment today. Call us at 425-454-1322.

Don't forget to pick up SuperSmile® toothpaste, available in the Spektor Smile Store to gently brighten and maintain your great smile. To order SuperSmile® or Dr. Wendy's other favorite dental products, please give us a call.

## Introducing Demandforce®

No, it's not the latest action movie! Welcome to our online patient communication system. Demandforce will send you online appointment reminders and even send you a quick patient survey after your visit so you can tell us how we're doing. Email us at [teamspektor@spektordental.com](mailto:teamspektor@spektordental.com) and we'll add or update your email address.

Don't forget to check out our updated website: [www.spektordental.com](http://www.spektordental.com)
